About GridsGlobal

- ❖ GridsGlobal is an engineering company that has a strong foundation in technology and it is located in **United States and India**.
- ❖ We have established our engineering office in 2024 with the goal of expanding its global footprint into the construction industry.
- ❖ Experienced management and production teams are our greatest assets.
- ❖ We are specialized in providing services such as steel detailing, connection design, estimation using the software like **Tekla, SDS2, Advance Steel** and **IdeaStatica**.
- ❖ Specialized in executing **Commercial, Industrial, Residential and Stadium projects**.
- ❖ Expertised in handling the **main steel and miscellaneous** scopes of the project.
- ❖ Customer satisfaction is our primary objective.

Company Vision

-  We aspire to be the most reliable engineering company to deliver client requirements on a timely basis with the finest quality output.

Company Mission

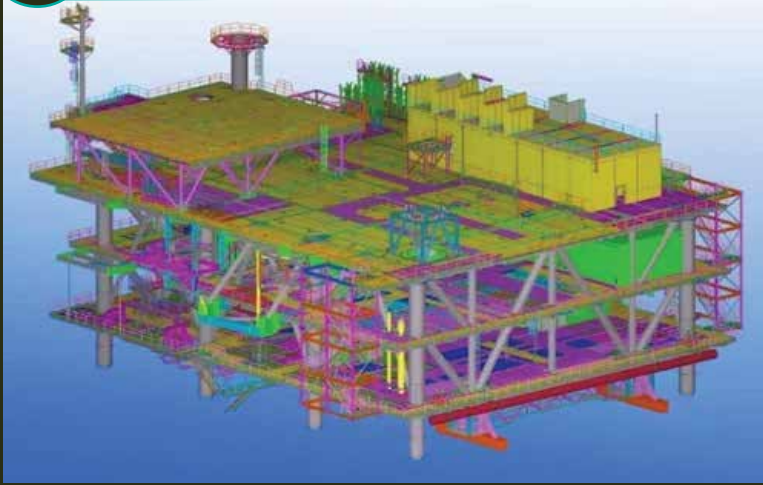

-  To be a premier provider of engineering & design services focused on delivering superior quality service that results in high levels of customer satisfaction.

Company Values

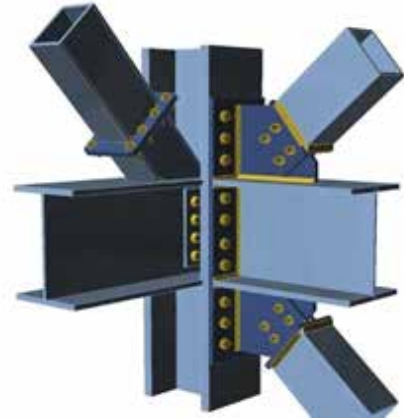

-  Growing together is our motto that we follow within and outside our business. We believe our employee's growth as an individual and customer's business growth paves the way for our own company's growth.
